SUMMARY.

Whole number of words 945, of which 485 occur in Isaiah A, and only 439 in Ezekiel, Haggai, Zechariah, and Malachi combined (class *e*, second notation). As A contains 44 pages and *e* 109, the words of the Index occur in the former in the ratio to the latter of nearly three to one. If B belongs to class *e* the further fact is inexplicable that his vocabulary coincides with A against *e*, when each arbitrary division of the Index according to the letters of the alphabet is taken separately. Why did he *never happen* to speak the language of his own age? The ratios are as follows:

א 11 : 8. ב 10 : 8. ג 8 : 8. ד 4 : 1. ה 5 : 2. ו 5 : 3.
 ז 10 : 8. ח 2 : 1. ט 8 : 8. י 20 : 19. יא 11 : 4. יב 9 : 4
 יג 20 : 7. יד 10 : 8. יו 23 : 7. יז 8 : 1. יח 10 : 8. יט 15 : 7.
 כ 5 : 2. כא 35 : 16. כב 45 : 17. כג 5 : 2.

An Article pointing out some of the most interesting facts pertaining to special words in the Index will conclude this series.
